Aug 9, 2017 . Proton pump inhibitors (known in Australia by names such as **Nexium**, Pariet, Losec, Somac and **Zoton**) work by preventing key pumps in the cells of the stomach that produce stomach acid from working. In stopping the production of stomach acid they help to reduce the inflammation and heal ulcers caused . PPIs available in Australia, and their original brand names are: Omeprazole (Losec); Esomeprazole (**Nexium**); Rabeprazole (Pariet); Pantoprazole (Somac); and Lansoprazole (**Zoton**). All PPIs work in the same way. They bind to the same receptors in the body, and produce the same effect, with a similar side effect profile. It is no surprise that 40mg S-omeprazole in **Nexium** 40mg is more effective than the 10mg of S-omeprazole plus 10mg of R-omeprazole. However a larger dose of omeprazole would be just as "powerful" as esomeprazole (**Nexium**) 40mg. The other comparison is esomeprazole (**Nexium**) 40mg vs lansoprazole (**Zoton**) 30mg . Common brand names: Losec, **Nexium**, Somac, **Zoton** What they do: they inhibit (or almost eliminate)

stomach acid production. How to use them: PPI tablets are made up of small pellets covered in enteric coating which helps the small pellets get through the stomach to do their work. They must not be chewed or crushed. May 25, 2007 . of omeprazole (Losec), pantoprazole (Somac) and lansoprazole (**Zoton**), and have concluded that the use of PPIs in pregnancy is not associated with an increased risk of teratogenesis. However, despite their classification, the use of newer PPIs including rabeprazole (Pariet) and esomeprazole (**Nexium**) . Apr 23, 2017 . Losec, **Nexium**, Somac, **Zoton**. PPI tablets are made up of small pellets covered in an enteric coating which helps the small pellets get through the stomach to start working. It is very important that they must not be chewed or crushed. It may be mixed in a small amount of water, and then add it to a spoonful of . Compare **Nexium** vs. **Zoton**, which is better for uses like: Reflux, GERD and Heartburn. Compare head-to-head ratings, side effects, warnings, dosages, interactions and patient reviews. Patients rated **Zoton** 3.8/5 over **Nexium** 3.4/5 in overall satisfaction. esomeprazole (**Nexium**);; lansoprazole (**Zoton** FasTabs);; omeprazole (Losec);; pantoprazole (Somac); and; rabeprazole (Pariet). Most people's symptoms of reflux can be relieved with proton pump inhibitors. PPIs should be taken 30-60 minutes before a meal (usually breakfast). There are also some proton pump inhibitors . Jun 17, 2009 . Millions who suffer with GERD (Gastroesophageal Reflux Disease), who don't already use prescription drugs Prevacid or **Nexium**, are considering it, and maybe you're one of them. Both drugs are "proton pump inhibitors," pharmaceuticals that suppress the production of stomach acid by inhibiting the action . Internal Code Name on
